Suitable for:

Castlegate James Hominy Meal is a blend of corn bran, floury endosperm and corn germ produced during corn milling. High in ruminant Metabolisable Energy (ME); Hominy Meal is a valuable ingredient to add into dairy, beef, poultry and pig feed rations.

### What is Hominy?

When processing maize (corn), it is cleaned and then seeped. Afterwards it is ground and screened. The co-product from screening is the Hominy Meal.

### Benefits

Hominy Meal offers the following features and benefits;

- Extremely high in ruminant Metabolisable Energy (ME) and also acts as a strong glucose precursor.
- Slower digesting starch when compared to traditional cereal grains.
- Valuable source of protein

### Feeding guide

Use 1 -3 kg per cow per day in dairy Total Mixed Rations. With a high fat content Hominy Meal usage may vary according to other feeds used. Although Hominy Meal is a dry, free flowing meal, it is not suitable for storage in silos.

### Availability

Hominy meal is available on a long term and regular basis for customers wish to secure an ongoing supply. Customers can choose to purchase Hominy Meal on a spot basis subject to availability or enter a contract to ensure guaranteed supply.
