Zinc	182mg	Vitamin E	364iu	Vitamin B12	42.0ug
Iron	184mg	Biotin	0.3mg		

Feeding guide

Horses in full work require on average 4kg to 6kg of Performance per day, in conjunction with a minimum of 1% of body weight of good quality pasture, hay and/or chaff.

Introduce Performance into the diet slowly over 7 to 14 days.

Ensure all horses have access to clean and fresh water.

Feed Performance by weight, not volume.

If feeding more than 0.5% of Performance plus other grains per day, divide the total daily amount into two or more equal feeds.

Do not add additional vitamins/minerals without veterinary consultation.

This feed is a concentrate and not recommended for horses confined to stables and not receiving regular exercise.

Additional notes

This information should be used as a general guide only. Please consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material.
