Suitable for:

## Sweet Corn Co-Product

Sweet Corn is a co-product of food manufacture industry.

They provide a safe and palatable feeding option through March early April. Naturally high in digestible energy and moderate Rumen degradable protein, Castlegate James Sweet Corn offer a high value feed at times were extending the round is require.

Castlegate James Sweet Corn can be fed straight to dairy

cows and are suitable for feeding on a feed pad or direct into a paddock for grazing. Having good level of sugar delivers great energy a levels which are require at this time of the season, and make for a super palatable feed.

Ideally stored in a bunker, but can be tipped directly in a silage pit or paddock, Castlegate James Sweet Corn have a shelf life of around 8-14 days.

As such your Castlegate James representative will set up an allocation to ensure consistent, fresh supply of product to optimize all feed coming on farm. Castlegate James Sweet Corn is a perfect companion feed to be fed alongside pasture or any other feeds you have on farm. They can also be used to extend pasture round as a direct replacement for pasture if required.

### Feeding guide

Sweet Corn is only suitable for ad-lib feeding when Castlegate James guide lines are followed.

Total dietary levels of starch and soluble sugars, NDF and effective fiber should be monitored when feeding Sweet Corn.

To discuss feeding levels further please call the Castlegate James team on **0800 67 3333**.
