

Castlegate James

Energy Booster

THE PERFECT BLEND OF ENERGY-RICH PRODUCTS

This feed is also suitable for:

For information call Castlegate James on 03 8311 2200

Castlegate James Energy Booster provides the perfect blend of starches, sugars, fats and digestible fibre products. This unique high-energy co-product feed is perfect for sheep, dairy cattle, beef cattle and pigs.

Formulating the correct amount of energy for a ration can be a difficult and costly process. Incorporating Energy Booster into feeding systems can improve production efficiency and save extra money.

BENEFITS

High level of energy

Energy Booster is a valuable energy source, well above the levels found in most grains, for ruminants with a metabolisable energy (ME) of 14.8Mj/Kg. For pigs, Energy Booster is more digestible than the energy content found in grains.

Complements high protein grasses

Energy Booster's highly soluble sugars and fibre break down at the same rate as the soluble protein in pasture grasses, therefore improving utilisation and efficiency.

Easy to use

Energy Booster requires no further processing or packaging to handle.

Highly palatable

Cattle, sheep and pigs readily consume Energy Booster due to its high sugar content.

High levels of starch and sugar

World-renowned ruminant nutritionist Dr Bob Elliott says starch and sugar content in rations are just as critical as energy to improved ruminant microbial fermentation, therefore ensuring:

- Better milk protein and higher milk volumes in dairy cattle.
- Improved rumen function leading to great weight gain in beef cattle and sheep.
- Improved feed conversion efficiency and weight gain in pigs due to the highly digestible nature of both starch and sugar.
- Highly compatibility with breakdown of feeding urea in the rumen.

FEEDING GUIDE

Due to the high Non-Fibre Carbohydrates (NFC) and low fibre content within Energy Booster, using an adequate effective fibre source is encouraged.

AVAILABILITY

Customers can choose to purchase Castlegate James Energy Booster on a spot basis subject to availability or enter a contract ensuring guaranteed supply.

ADDITIONAL NOTES

This information should be used as a general guide only. Please consult with your nutritional advisor to determine the appropriate needs for you animals.

This product does not contain restricted animal material.
