Proteena[®] Golden Feed (PGF) is an economical, high quality bulk feed alternative which helps lower feed costs in dairy TMR's and intensive beef cattle enterprises. PGF is a medium protein, high energy feed that can be included in dairy rations up to 25% of total dry matter intake.

A co-product produced from the processing of corn for human consumption, PGF contains high levels of highly digestible fibre and rumen degradable protein. The high energy, medium protein and highly digestible fibre content makes PGF a high value feed assisting optimal levels of production.

PGF is excellent forage extender, reducing the reliance on pasture or silage eg. can be used as a pasture replacer enabling paddocks to be rested for further growth or silage production.

The small particle size and highly digestible fibre content enables a high dry matter intake (DMI) due to the fast rate of passage through the rumen. In addition, although the digestion and rate of passage of PGF is relatively fast, the highly digestible fibre content still contributes and assists in maintaining an optimal rate of butterfat synthesis.

PGF complements pasture based feeding and fibre digestion, anecdotal evidence has shown an increase in milk production once rumen microbes have adapted to PGF. With a low starch content of approximately 16.0% it can be useful as an alternative to starch based grains should acidosis be an issue.

FEEDING GUIDE

Up to 25% of total DM intake i.e. 20kg DM intake = 12.5kg of PGF as fed or 5kg of PGF on a DM basis.

PGF can be fed fresh and is recommended to be used within 14 days of delivery depending on weather conditions. It may be ensiled for longer term usage.

AVAILABILITY

Castlegate James Proteena Golden Feed is available on a long term and regular basis for customers wishing to secure an ongoing supply. Customers can choose to purchase Proteena Golden Feed on a spot basis subject to availability, or enter a contract ensuring guaranteed supply.

ADDITIONAL NOTES

This information should be used as a general guide only. Please consult with your nutritional advisor to determine the appropriate needs for you animals.

This product does not contain restricted animal material.
