Castlegate James Mill Mix is produced from the milling of wheat for flour and is widely used in dairy, beef, pig and poultry rations as well as supplementary feeding.

BENEFITS

Valuable source of protein

The protein content of Mill Mix is a very good replacement for grass or to enhance forage sources.

Excellent source of essential nutrients

Mill Mix consists of bran, aleurone, germ and pollard fractions. The germ is also an excellent source of fat, fat-soluble vitamins (A, D, E, K) and minerals.

Lower risk of digestive disturbance

Higher levels of fibre and reduced levels of starch offer reduce the risk of digestive disturbance in animals.

Economically competitive

Mill Mix is an economically competitive source of protein and energy and requires no additional processing.

FEEDING GUIDE

Mill Mix is typically used at rates up to 5–6 kilos per cow per day in total mixed rations. Mill Mix can easily be incorporated into cattle diets and can be fed at high inclusion levels.

AVAILABILITY

Castlegate James Mill Mix is available on a long term and regular basis for customers wishing to secure an ongoing supply. Customers can choose to purchase Mill Mix on a spot basis subject to availability, or enter a contract ensuring guaranteed supply.

QUALITY PROMISE

All Castlegate James products are manufactured in our FeedSafe® accredited mills following our stringent Quality Assurance Program. As one of Australasia's largest feed manufacturers, we ensure that all feeds manufactured and supplied by our mills are of the highest standard, exceeding the expectations of our customers, every time.
